

# Elmer/Ice advanced workshop

## About the workshop

This workshop is intended for advanced Elmer/Ice users that want to exchange between each other and get information on latest developments within the package. The advantage this time is, that Elmer specialists from CSC will be present and available to discuss problems and possibilities that link to the code-base of Elmer.

**Time:** October 29<sup>th</sup> – 31<sup>st</sup>

**Place:** CSC-IT Center for Science Ltd., Keilaranta 14, Espoo. Best way to reach CSC is to take the metro and exit at Keilaniemi station (use exit B) – the approximate route is shown below.

**Participation:** Participation is free of charge. However, we do not provide catering (only free coffee, tea and water) – there is a cafeteria and a vending machine for small snacks to purchase. Lunch is on own expenses with a variety good-value-for-money (full buffet for 10€; soup & salad for less) lunch places close by.

**Preparations:** Please, **make sure to bring your own laptop** with Elmer/Ice being installed in some way. Since this is an advanced workshop, we simply assume that you are set and ready to go. Power outlets (EU standard) and wireless connection will be provided.

We will send you a list with possible topics to be addressed – you should choose.
